

Company Name Aiiwave

About Aiiwave

Aiiwave is a global, AI-driven managed services and technology company redefining how media, broadcast, and mission-critical operations are built, managed, and scaled. We enable broadcasters, enterprises, telecom operators, and government institutions to transition from traditional operations to intelligent, AI-powered workflows that deliver speed, resilience, and cost efficiency.

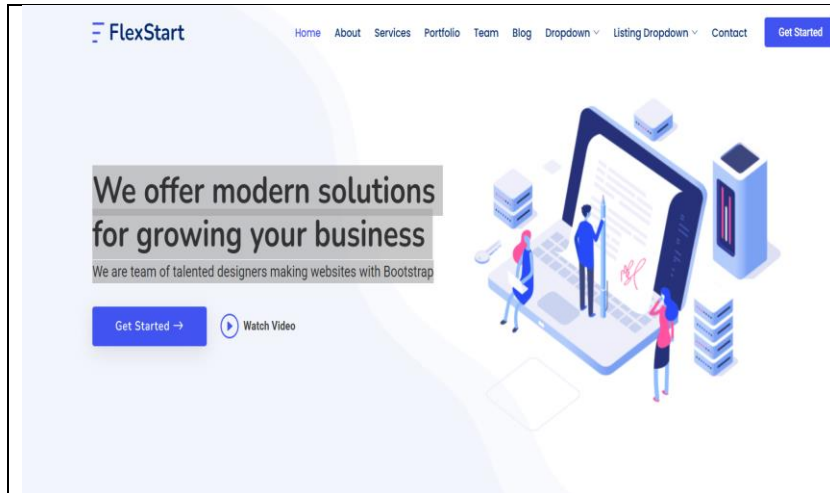

Aiiwave is fundamentally dedicated to comprehensive infrastructure intelligence, integrating artificial intelligence, cloud-native platforms, and automation to enhance the entire media and data lifecycle. We develop systems that are adaptive, predictive, and prepared for the future, covering all stages from acquisition to processing, archiving, and distribution.

Why Choose Aiiwave?

- Faster launches with flexible solutions
- Effortless scalability to meet growing demand
- Confident market expansion into new regions

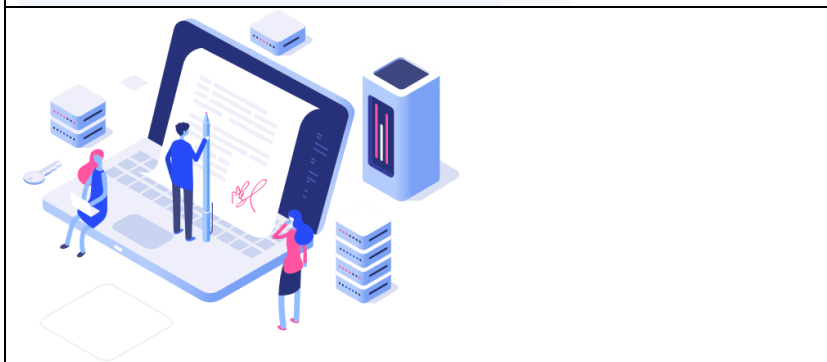

Aiiwave Leadership

Aiiwave's global leadership team brings together best-in-class executives with deep expertise across media, broadcast, cloud infrastructure, AI, and global distribution. Operating as a unified global organisation, our leadership fosters innovation, accountability, and long-term value, creating a shared path to success for Aiiwave and our customers.

Where Broadcast Meets Intelligence

Strong positioning line—bridges traditional media with AI innovation

Under Services

Global distribution:

[Global Distribution](#) [Picture.png](#)

Aiiwave global distribution services that empower your reach. Aiiwave connects broadcasters, enterprises, and content owners to audiences worldwide, spanning APAC, MENA, Europe, and LATAM, through networks that are reliable, secure, and built to scale.

Seamless Content Delivery

We specialise in receiving signals from multiple sources and delivering:

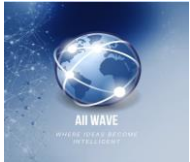

- Linear channels
- Live broadcasts
- Event-based content

All with high availability and built-in redundancy, ensuring a consistent, high-quality viewing experience every time.

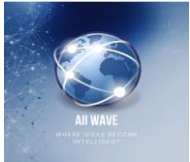

Cutting-Edge Technologies

Harnessing the power of IP, satellite, fibre, and cloud, we provide end-to-end distribution solutions tailored to your needs. From signal acquisition to channel placement on leading platforms, we make sure your content reaches the right audience.

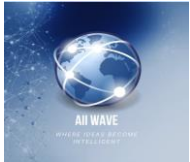

With Allwave, you don't just distribute content, you unlock global opportunities.

Outdoor 		Aiiwave partners with C- and Ku-band SNG service providers worldwide, serving as a single point of contact for cost-effective SNG sourcing. We negotiate with multiple SNG vendors on behalf of our customers to ensure optimal availability, competitive pricing, and maximum value—eliminating the complexity of managing multiple vendors. We deliver high-quality solutions for live sports, news, entertainment, disaster recovery, and special events. In addition, Aiiwave manages satellite bookings and acts as a key coordination link between production teams and SNG operators. We also handle logistics and country-specific regulatory permissions on an event-by-event basis, ensuring all resources are fully aligned before the event goes live. By combining cutting-edge broadcast technology and years of experience, we deliver seamless services, extended reach, and an exceptional customer experience.
IP Distribution 	<u>IP Distribution.png</u>	TV channel distribution over Internet Protocol (IP) represents a modern evolution from traditional broadcast methods such as satellite and cable. By delivering video content as secure digital data over managed or public networks, IP distribution offers greater flexibility, scalability, and cost efficiency. As an IP solutions provider, Aiiwave enables broadcasters, content owners, and enterprises to transition seamlessly to IP-based distribution models, supporting industry-standard protocols such as Zixi and SRT for secure, reliable, and low-latency delivery. Transitioning to IP with Aiiwave Broadcasters and enterprises are increasingly adopting IP-based workflows to stay competitive, expand audience reach, and improve operational efficiency. Whether launching a commercial streaming service, a FAST

		channel, or a private corporate TV network, Aiiwave delivers end-to-end IP distribution solutions tailored to your business requirements. Aiiwave is fully capable of acquiring and transporting channels from anywhere in the world—whether sourced via satellite or from a global Point of Presence (PoP). Our solutions support seamless signal acquisition, intelligent routing, and reliable global distribution across IP networks. Designed to simplify operations, our platforms ensure high availability, robust security, and seamless scalability. Key Benefits • Cost Efficiency: Eliminates the need for expensive satellite transponders or dedicated fiber lines. • Global Scalability: Content can be distributed globally to any platform • High Quality: Modern IP protocols like SRT & Zixi allow for low-latency, broadcast-quality streams.
Consultancy 	<u>Consultancy Services.png</u>	In a world where broadcast and media are evolving at unprecedented speed, staying ahead requires more than just technology—it demands intelligence, agility, and precision. Aiiwave empowers broadcasters, platforms, and media companies to transform faster, operate smarter, and deliver at scale. We combine AI-driven innovation with deep broadcast expertise to optimize your entire value chain—from content acquisition to distribution. Whether you’re modernizing infrastructure, scaling global delivery, or automating workflows, Aiiwave delivers solutions that reduce costs, improve performance, and accelerate time to market. Our approach is simple: align technology with business outcomes. We don’t just implement solutions—we drive measurable impact, enhance viewer experiences, and unlock new revenue opportunities. With Aiiwave as your partner, you gain the competitive edge to lead in a rapidly changing media landscape—powered by intelligence, built for scale, and designed for the future.

Products Section:

AI Dubbing

Expand Your Global Reach

Breaking language barriers has traditionally been expensive and time-consuming. Our AI Dubbing solution allows content owners to instantly localise their content into multiple languages without reshooting or hiring multiple voice actors.

Using advanced speech synthesis and voice cloning technology, AI recreates natural-sounding voiceovers that maintain the original tone, emotion, and timing of the speaker.

Key Capabilities

- Automatically translate and dub content into multiple languages
- Natural voice synthesis and emotion
- Lip-sync alignment for seamless viewing experience
- Supports large-scale content libraries

Business Benefits

- Reach global audiences faster
- Reduce localisation costs dramatically
- Launch content simultaneously across regions

- Scale multilingual distribution without expanding production teams

The AI Dubbing solution is perfect for OTT platforms, broadcasters, studios, and global content distributors.

Top-Take Studio

Instantly Find the Most Engaging Moments

Editors and producers spend hours reviewing footage to find the perfect highlights. TopTake Studio uses AI to analyze your entire video library and instantly identify the most engaging moments that will capture audience attention.

The platform detects emotional reactions, action sequences, dialogue peaks, and audience engagement signals to automatically create highlight clips, trailers, and social media teasers.

Key Capabilities

- AI-driven highlight detection
- Automated creation of trailers and social clips
- Engagement scoring for scenes
- Rapid export to social platforms

Business Benefits

- Cut editing time from hours to minutes
- Increase social engagement with optimized clips
- Accelerate promotional content production

- Maximize the value of every video asset

TopTake Studio is ideal for sports broadcasters, live events, entertainment networks, and digital publishers.

Quick Caption

Broadcast-Grade Subtitles in Seconds

Subtitles are critical for accessibility, global distribution, and viewer engagement, but creating them manually is slow and resource-intensive.

Quick Caption uses advanced speech recognition and timing algorithms to generate perfectly synchronised, broadcast-ready captions in seconds.

Key Capabilities

- Automatic speech-to-text transcription
- Almost frame-accurate subtitle timing
- Customisable styling to meet platform requirements
- Multi-language subtitle generation

Business Benefits

- Improve accessibility and compliance
- Increase viewer retention on social platforms
- Reduce manual subtitle creation time
- Enable faster international distribution

Quick Caption is perfect for broadcast networks, OTT services, news channels, and corporate video teams.

Spotlight

Optimise Videos for Vertical Platforms Instantly

Modern audiences increasingly consume video on mobile-first platforms like TikTok, Instagram Reels, and YouTube Shorts. However, converting horizontal content into a vertical format traditionally requires manual editing.

Spotlight automatically transforms widescreen video into vertical format while intelligently tracking the main subject to keep them perfectly framed.

Key Capabilities

- Smart AI subject tracking
- Automatic vertical cropping
- Platform-ready aspect ratios
- Multi-format export for social media

Business Benefits

- Repurpose existing content for mobile platforms
- Increase reach on social media channels
- Reduce manual editing workload
- Publish platform-optimised content instantly

Spotlight is a must-have for digital teams, sports leagues, content creators, and media companies.

Smart Episodes

Instantly Turn Long Videos into Binge-Ready Series

Long-form recordings such as interviews, podcasts, webinars, or events often contain multiple segments. Smart Episodes uses AI to detect natural scene changes and split content into structured episodes automatically.

Key Capabilities

- Scene detection and segmentation
- Automatic episode creation
- Smart transitions between segments
- Batch processing for large content libraries

Business Benefits

- Save hours of manual editing
- Convert long recordings into bingeable content
- Create episodic series quickly for OTT or social platforms
- Increase content consumption and engagement

Smart Episode is ideal for podcasters, webinar producers, conference organisers, and OTT platforms.

Smart Thumbnails

Drive Clicks with AI-Generated Visuals

Thumbnails are one of the most important drivers of video performance. Smart Thumbnails analyses your content and automatically selects the most expressive frames to create visually compelling thumbnails.

Key Capabilities

- Facial expression and emotion detection
- Frame quality and composition analysis
- Automatic thumbnail generation
- Platform-optimized formats

Business Benefits

- Increase click-through rates
- Remove guesswork from thumbnail design
- Speed up publishing workflows
- Improve video discoverability

Smart Thumbnails is perfect for YouTube creators, OTT platforms, and digital media publishers.

Metadata Studio

Automate Metadata and Asset Organisation

Metadata plays a critical role in content discovery, searchability, and platform distribution. Metadata Studio automatically analyses your video content and generates titles, tags, descriptions, and keywords.

Key Capabilities

- AI-based content analysis
- Automatic title and description generation
- Tag and keyword recommendations
- Platform-ready metadata formatting

Business Benefits

- Streamline publishing workflows
- Improve content discoverability
- Ensure consistent metadata across platforms
- Simplify asset management

Metadata Studio is ideal for content libraries, broadcasters, OTT platforms, and digital publishers managing large video catalogues.
